有没有一种教育，
关注于人的成长，并陪伴他/她的一生？

有没有一种教育，
根基于人的天赋，并大规模适用于所有的人？

有没有一种教育，
它实现了人类知识的传承和传递，
也呵护了人们满足好奇的天性和不断突破的使命？

Is there an education that focuses on a person's growth and
accompanies them throughout their life?

Is there an education that is based on a person's talent and
can be widely applied to everyone?

Is there an education that achieves the inheritance and transmission of human knowledge,
while also nurturing the innate curiosity and the drive to constantly break through?

About X-Institute

关于 零一学院

深圳零一学院是在清华大学钱学森力学班（简称“清华钱班”）十二年探索与实践基础上，于2021年由深圳市委市政府发起创立的一所公办教育科技人才一体化学院。学院由清华钱班创办首席郑泉水院士领衔的团队负责创建与发展，依托清华大学深圳国际研究生院作为举办单位，开创了独具特色的全新教育机制。

零一学院致力于突破传统教育的学段、地域、学科与文化壁垒，汇聚全球顶尖导师，以重大创新挑战问题为牵引，实施“进阶研究-精深学习”的高度个性化教育。学院与学生所在学校紧密协作，共同培养立志通过科技创新改变世界、造福人类的顶尖创新型人才。

Shenzhen X-Institute was established in 2021 by the Shenzhen Municipal Party Committee and the Municipal Government as a public institution integrating education, science and technology, and talent development. It was founded and developed based on the 12 - year exploration and practice of the Qian Xuesen Class of Tsinghua University (referred to as "Tsinghua Qian Class"). The institute is led by a team headed by Academician Zheng Quanshui, the founder of Tsinghua Qian Class, and relies on the Tsinghua Shenzhen International Graduate School as the host organization, pioneering a unique new educational mechanism .

The X-Institute is committed to breaking through the barriers of traditional education in terms of academic stages, regions, disciplines, and cultures. It gathers top - notch mentors from around the world and implements highly personalized education of "advanced research - in - depth learning" driven by major innovative challenges. The institute closely collaborates with the students' home schools to jointly cultivate top - notch innovative talents who are determined to change the world and benefit humanity through scientific and technological innovation.

X-Institute's Question

零一之问

为什么我们总是出不了改变世界的创新型人才？

Why can't we produce innovative talents who change the world?

能否在 10-20 年时间内，用创生教育颠覆应试教育？

Can we disrupt the examination-oriented education within 10-20 years with "creative growth" education?

零一之问交互破解，帮助学生找到热爱所在，培养能够实现从 0 到 1 的创新型人才

Interactively solving X-Institute's questions, helping students find their passion, Cultivating talents who can achieve innovation from 0 to 1.

使命 Mission

发掘和陪长通过科技改变世界、造福人类的创新型人才；
启迪和帮助无数年轻人绽放创新激情
To discover and accompany innovative talents who change the world and benefit humanity through technology;
To inspire and help countless young people to shine with innovative passion

愿景 Vision

成为未来形态的世界顶尖“大学”；
成为数智时代创新教育全新范式的开创者和持续引领者
To become the world's top "university" in the future form;
To be the creator and continuous leader of a new paradigm of innovative education in the digital intelligence era.

清华钱班 践行初心辟蹊径

Tsinghua Qian Class - Practicing the Original Intent and Pioneering a New Path

2009 年，郑泉水院士开始担任教育部“基础学科拔尖学生培养试验计划”清华学堂钱学森力学班（简称“清华钱班”）创办首席教授，在清华大学开启探索创新人才培养之路，探索回答“钱学森之问”。

清华钱班模式回归教育的本质，成功把以老师“教”为中心转变为以学生“学”为中心，帮助学生找到了自己独特的天赋和研究的激情，激发内生动力，收获个性化成长。

In 2009, Academician Zheng Quan Shui began to serve as the founding chief professor of the "Basic Disciplines Top Students Cultivation Pilot Program" Tsinghua Qian Xuesen Mechanics Class (referred to as "Tsinghua Qian Class"), starting the exploration of innovative talent cultivation at Tsinghua University, exploring to answer the "Qian Xuesen Question".

The Tsinghua Qian Class model returns to the essence of education, successfully transforming from teacher-centered "teaching" to student-centered "learning", helping students find their unique talents and research passion, stimulating internal motivation, and harvesting personalized growth.

发展历程

Exploration Practice

创始院长

Founding Dean

郑泉水

Zheng Quanshui

中国科学院院士，清华大学钱学森班创办首席，清华大学深圳国际研究生院教授，深圳零一学院创始院长。曾任清华大学工程力学系主任、中国力学学会副理事长、中国力学学会旗舰杂志《力学学报》和 Acta Mechanica Sinica 主编等。

郑泉水于1980-90年代创建完整的本构方程张量函数理论；2000年后开创结构超滑（指两个固体表面接触滑移时摩擦几乎为零、磨损为零的状态）理论与应用技术，并致力于拔尖创新型学生的培养和创新教育的研究。2004、2017年两次获国家自然科学奖二等奖（第一获奖人），2018年获国家级教学成果一等奖，2021年获第三届杰出教学奖，2022年获科技部首届颠覆性技术大赛总决赛最高奖——优胜奖。

Academician of the Chinese Academy of Sciences, Chief Founder of the Qian Xuesen Class at Tsinghua University, Professor at Tsinghua Shenzhen International Graduate School, and Founding Dean of Shenzhen X-Institute. He has served as the Head of the Department of Engineering Mechanics at Tsinghua University, Vice Chairman of the Chinese Society of Theoretical and Applied Mechanics, and Chief Editor of the flagship journal of the Chinese Society of Theoretical and Applied Mechanics, Acta Mechanica.

Sinica. Zheng Quanshui established the complete theory of constitutive equation tensor functions in the 1980s and 1990s; after 2000, he pioneered the theory and application technology of structural super-sliding referring to the state where friction is almost zero and wear is zero when two solid surfaces are in contact and sliding, and has been committed to the cultivation of top innovative students and the research of innovative education. He received the Second Prize of the National Natural Science Award twice in 2004 and 2017 as the first recipient, the First Prize of the National Teaching Achievement Award in 2018, the Third Distinguished Teaching Award in 2021, and the Supreme Award-Excellence Award in the first Science and Technology Ministry's Disruptive Technology Competition in 2022.

发现的“第一性原理”

The "First Principle" of Discovery

什么是零一
What is X-Institute

零一学院“X3聚变”

X-Institute's "X3 Fusion"

创新的教育模式

Innovative Educational Model

什么是零一
What is X-Institute

零一学院“破界创生”的教育

X-Institute's "Boundary-Breaking and Innovation-Motivated " Education

《道德经》说：“道生一，一生二，二生三，三生万物。”这段话被用来描述道家对宇宙起源和万物生成的观点。有趣的是，可将清华钱班-零一学院模式核心或灵魂，描述为具有相似哲理的如下“一中心、双螺旋、三聚变、三生无界”：

The Tao Te Ching states: "The Tao gives birth to one, one life gives birth to two, two gives birth to three, and three gives birth to all things." This passage is used to describe the Taoist view on the origin of the universe and the generation of all things. It is interesting to describe the core or soul of the Tsinghua Qian Ban 01 College model as having similar philosophies, such as "one center, double helix, triple transformation, and three lives without boundaries":

● 一中心——以学生的激情为中心

这是学生成长的真正内生动力（内因）所在。创造一个环境（外因），帮助学生找到他/她自己独特的激情（感兴趣、又擅长和有意义交汇的事情或问题），鼓励他/她全力以赴去追求。

One Center - Centered on the students' passion

which is the true internal driving force (internal cause) for students' growth. Create an environment (external cause) to help students find their unique passion (the intersection of being interested, good at, and meaningful things or problems), and encourage them to pursue it wholeheartedly.

● 双螺旋——进阶研究-精深学习

是帮助每个学生找到自己独特的激情、并实现痛快成长的高效方法论。积极心理学中的“心流”理论，是用好这个方法论的基础。

Double Helix - Advanced research - in-depth learning

is an efficient methodology to help each student find their unique passion and achieve rapid growth. The "flow" theory in positive psychology is the foundation for using this methodology well.

● 三聚变——X型学生-X型问题-X型导师匹配聚变

构成了如何实现师生相互吸引、成就共同梦想的“第一性原理”，体现的是心理学中马斯洛需求理论的最高端——学生的“自我实现”和导师的“超越需求”。

Three Fusions - The matching fission of X-type students - X-type problems - X-type mentors constitutes the "first principle" of how teachers and students attract each other and achieve common dreams, reflecting the highest end of Maslow's hierarchy of needs - the students' "self-actualization" and the mentors' "transcendental needs."

● 三生无界——跨越限制

零一学院的问题挑战性无界、学生年龄不限、跨越校园和地域、跨越学科等。

Three Births Without Boundaries - X-Institute's problem challenges are boundless, students' ages are unlimited, crossing campuses and regions, and crossing disciplines.

创新的体制机制

政府支持与社会关注

Government Support and Social Attention

深圳市政府坚定支持

The Shenzhen Municipal Government firmly supports.

- 2024 年6 月 20 日，覃市长在现场办公会中指示，由清华大学深圳国际研究生院承接零一学院的举办单位，双方中度融合，加快零一的规范发展；
On June 20, 2024, Mayor Qin instructed at the on-site office meeting that Tsinghua Shenzhen International Graduate School would take over as the hosting institution for X-Institute, with moderate integration between the two parties to accelerate the standardized development of X-Institute.
- 9 月 11 日，覃市长再次到零一考察并见证了医疗器械领域的头部企业迈瑞医疗与零一学院的捐赠与合作协议达成。
On September 11, Mayor Qin visited X-Institute again and witnessed the signing of a donation and cooperation agreement between Mindray, a leading enterprise in the medical device field, and X-Institute.

定义创生教育新品类

Defining a New Category of Innovation-Motivated Education

《Boundary-Breaking and Innovation-Motivated》
Author: Zheng Quanshui
This work has the potential to redefine a new category of education and impact the educational ecosystem.

中央和社会各界重视

The central government and all sectors of society attach great importance to it.

- 2024 年 10 月，全国政协邵鸿副主席带队专门到学院考察调研拔尖创新人才培养的新模式。
In October 2024, Vice Chairman Shao Hong of the National Committee of the Chinese People's Political Consultative Conference (CPPCC) led a team to visit the institute specifically to investigate and study the new model of cultivating outstanding innovative talents.
- 2024 年 7 月到 9 月，教育部吴岩副部长两次听取郑泉水院士汇报拔尖创新人才培养新模式推广的有关建议。
From July to September 2024, Vice Minister Wu Yan of the Ministry of Education listened twice to Academician Zheng Quanshui's report on suggestions for promoting the new model of cultivating outstanding innovative talents.
- 珠海市、苏州市、江门市等政府领导率队到学院调研，就拔尖创新人才的初期选拔、贯通培养进行了深度沟通与交流。
Government leaders from Zhuhai, Suzhou, Jiangmen, and other cities led teams to visit the institute to conduct in-depth communication and exchange on the initial selection and integrated training of outstanding innovative talents.
- 2024 年 9 月，科技部新技术中心“根在基层”考察团专程到学院就颠覆式科技创新与颠覆式拔尖人才培养的紧密结合进行调研。
In September 2024, the "Rooted in the Grassroots" investigation team from the Ministry of Science and Technology's New Technology Center visited the institute specifically to study the close integration of disruptive technological innovation and the cultivation of outstanding innovative talents.
- 2024 年 10 月，中国科协青少年中心领导一行到学院专程调研并探讨未来合作。
In October 2024, leaders from the China Association for Science and Technology (CAST) Youth Center visited the institute specifically to investigate and discuss future cooperation.

围绕五大方向构建X型问题驱动的人才培养体系

Building an X-shaped Problem-Driven Talent Cultivation System Around Five Major Directions

具有重大挑战性的X型问题

X-shaped problems with significant challenges

人才贯通培养初见成效

The Integrated Cultivation of Talent Has Initially Shown Results

截至今日 零一学子培养体系中

- E-SRT阶段培养节点共121人, 其中立项阶段58人, 中期19人, 结题44人
- ORIC阶段培养节点共32人, 其中立项阶段6人, 中期4人, 结题22人
- SURF阶段, 有2位学生在美国高校和科研院所完成了高年级本科研究员(SURF), 有13位同学正在哈佛大学、MIT、耶鲁大学等QS排名前70的大学进行SURF。

To date, within the X-Institute Student cultivation system,

- there are 121 students at the E-SRT stage, with 58 at the initiation stage, 19 at the mid-term stage, and 44 at the conclusion stage.
- There are 32 students at the ORIC stage, with 6 at the initiation stage, 4 at the mid-term stage, and 22 at the conclusion stage.
- In the SURF stage, 2 students have completed the Senior Undergraduate Research Fellowship (SURF) at American universities and research institutions, and 13 students are currently undertaking SURF at universities such as Harvard, MIT, and Yale, which are ranked in the top 70 by QS.

2024年

- 来自全球290余所中学的818位学生, 综合遴选其中134名(来自90余所中学)同学进入2024X-Camp少年营, 最终遴选出25名星空少年。
- 来自全国 97 所大学的847名优秀学子, 综合遴选其中237位同学(来自全国52所大学)进入2024X-Challenge Camp大学营, 最终遴选出107名零一学子。
- 818 students from over 290 high schools worldwide were considered, and 134 (from more than 90 high schools) were selected to join the 2024 X-Camp Youth Camp, with 25 students ultimately chosen as Starry Youth.
- 847 outstanding students from 97 universities across the country were considered, and 237 (from 52 universities) were selected to join the 2024 X-Challenge Camp University Camp, with 107 students ultimately chosen as X-Institute Students.

X 型人才评价五维模型

MOGWL Model

零一学院遴选创新人才采取以内生动力、开放性、坚毅、智慧和领导力为核心的“五维度”评价体系，对学生进行长周期考察，提早发现高潜创新天才、奇才，提高创新人才识别率。

X-Institute selects innovative talents from those who are 14 years old and above, through pilot study courses, summer schools and other research-based practical activities. It focuses on early enlightenment of innovative thinking, adopts "MGOWL" evaluation system based on students' long-term innovation practices, with Motivation, Grit, Openness, Wisdom and Leadership as its core. Through a long-term evaluation, X-Institute can identify high potential innovative talents at an early stage, and improve the accuracy of innovative talents identification.

零一环境展示

X-Institute Environment Showcase

零一学院坪山基地

建有开放智慧实验室约5600m²，包括微纳技术实验室 (Nano-X)、生命健康实验室 (Bio-X)、智能 / 大数据实验室 (Smart-X)、机械装配实验室 (Fab-X)、未来电子实验室 (Electro-X)、可持续发展实验室 (SDG-X)、未来教育实验室 (Edu-X) 等，供师生开展跨学科交流探索。

X-Institute Pingshan Base

It features an approximately 5600 square meters open smart laboratory, including the Nano-X Micro and Nano Technology Laboratory, Bio-X Life Health Laboratory, Smart-X Intelligent/Big Data Laboratory, Fab-X Mechanical Assembly Laboratory, Electro-X Future Electronics Laboratory, SDG-X Sustainable Development Laboratory, and Edu-X Future Education Laboratory. These facilities are designed for teachers and students to engage in interdisciplinary communication and exploration.

零一学院总部（南山）

在深圳市南山区，建筑面积 7900m²，集聚了丰厚的战略性新兴产业资源，与西丽湖国际科教城产学研创新生态融合发展，可为汇聚全球 X 型“学生 + 问题 + 导师”提供开放创新平台和良好生态。

X-Institute Headquarters (Nanshan)

Located in Nanshan District, Shenzhen, with a construction area of 7900 square meters, it has gathered abundant strategic emerging industry resources. It integrates with the industry-academia-research innovation ecosystem of Xili Lake International Science and Education City, providing an open innovation platform and a favorable environment for gathering global X-type "students + problems + mentors".
